

BEING COVID-19 SAFE TIPS AND HINTS ON TOUR

This is a guideline for members to be aware of when travelling and booking accommodation, particularly when not travelling with family members.

The following information is extracted from the COVID Safe Industry Plan for Qld Tourism and Accommodation.

Pre-screening is undertaken at all businesses wherever possible

Social Distancing is compulsory

- Indoor venues - 4 square meters per person / minimum 1.5m from others
- Also applies in elevators and stairwells

Transport & Travel

- Pre-screening
- Seating in vehicles (including buses, trains, rides, attractions, cars and boats) will be spaced to adhere to the 1.5 metre distancing (applies to groups over 50).
- Family/residential groups are permitted to sit in closer proximity but will be advised to maintain distance to other individual and family/residential groups.
- Tourism operators will reduce capacity to comply with the 1.5 metre social distancing
- **Suggest personal supply of hand sanitizer and masks**

Accommodation

- Book where the accommodation has a COVID-19 Safe Plan and displays a compliance statement
- For social distancing, a family unit, (ie. with the same residential address), will be managed as equivalent to one individual.
- As with individuals, each family unit will be required to maintain appropriate social distancing from all individuals who are not part of their direct family unit, even if travelling together.
- Be aware of high touch areas such as: screens, counter-tops, serving areas, elevator panels, hand rails, door handles, trolleys, vending machines, arcade and service machines.

Use **disposable products** where possible - paper towels in place of reusable towels in kitchens and bathrooms, disposable cutlery and plates, and coffee cups

Where practical, customers will be requested to dispose of cutlery, cups and plates in bins provided, and not to leave them for others (including staff) to touch.
